DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kullas U.S. Pat. No. 6,436,072 in view of Dennehey et al 4,201,406.

Kullas discloses a pumping unit (1) having an inlet (end connected to 10) and an outlet (end connected to 12), a handpiece (16) and tubing (12) connecting the outlet of said pumping unit to said handpiece, said pumping unit including a support (18) for the pumping unit, a flexible tube (10) connecting at one end to said inlet, and a spike (14) connected to the other end of said flexible tube (note: The spike of Kullas is fully capable of being adapted to penetrate a fitting in said irrigation bag. Further, applicant has not claimed a fitting.) Kullas does not disclose a lubricant (silicone) coating on the spike. Dennehey discloses a lubricating material that may be applied to the spike (col. 3, lines 5-20). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the spike of Kullas with a lubricant as taught by Dennehey so that the spike can be easily inserted into the irrigation bag (col. 3, lines 5-20). As to claims 15-16, (fig. 1).

As to claim 14, it is the examiner's position that a minimal portion of the spike can be coated with a lubricant thus enabling the spike to remain in frictional engagement with the fitting to support the weight of the spike and the flexible tubing. However, if one of ordinary skill in

Art Unit: 3763

the art would disagree, then it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the spike of Kullas with the spike (22) as taught by Dennehey for enabling the tube to be coupled to the irrigation bag with a snug pressure fit thus supporting the weight of the spike and flexible tubing (col. 3, lines 25-29 and fig. 1).

Response to Arguments

Applicant's arguments with respect to claims 12-16 have been considered but are moot in view of the new ground(s) of rejection.

Claims 21-23 have been canceled from co-pending application 09/688,178. Therefore, the double patenting rejection has been withdrawn.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3763

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
